

Defoamer 05

Antifoam Agent for Rendered Products

DESCRIPTION

Defoamer 05 is a silicone type, water based defoamer. *Defoamer 05* provides excellent knockdown and foam control in food processing applications such as in the vegetable processing of peas, beans, fruits, potatoes and brine solutions.

Defoamer 05 is also an extremely effective de-foaming agent in crab processing and controls most types of foaming problems.

SPECIAL INFORMATION

Defoamer 05 is a Canadian Food Inspection Agency (CFIA) approved product for use in registered food processing plants. Surfaces in direct food contact must be rinsed with potable water.

Keep container closed. Keep from freezing.

DIRECTIONS

Defoamer 05 can be metered or hand measured into the food process stream. For most applications, effective foam control can be obtained at a dosage of 50-500 ppm. Proper treatment levels depend on many factors including nature of contaminants, equipment, and conditions particular to a specific process or quality.
