

Hi Power Rinse

Machine Rinse Additive

DESCRIPTION

Hi Power Rinse is a liquid rinse additive which is metered into the final rinse of the dishwashing machine in very minute quantities through the rinse injector. *Hi Power Rinse* contains wetting agents to greatly reduce the surface tension of the rinse water. This allows water to drain completely and quickly producing spot-free, sparkling dishes and cutlery.

DIRECTIONS

Very minute quantities of *Hi Power Rinse* are injected directly into the final rinse through the rinse injector. For best results, and to meet local health regulations, the final rinse water temperature should be 80 °C - 90 °C (180 °F - 195 °F).

Please consult your Maxim representative for specific feeding recommendations to meet your particular needs.
