

Oxygentle

Hydrogen Peroxide Bleach

DESCRIPTION

Oxygentle is a liquid oxygen bleach, effective in removing stains from colored fabrics that chlorine bleach cannot be used on. **Oxygentle** contains Hydrogen Peroxide and quickly disperses throughout entire wash compartment using an Oxidation process to remove organic stains. There are no harmful waste products from using **Oxygentle**, just oxygen and water!

As well as preventing fabric discoloration from iron deposits, **Oxygentle** can be used on polyester fabrics or any other materials adversely affected by chlorine bleach.

SPECIAL INFORMATION

It is very important not to contaminate **Oxygentle** with organics or iron. A very small amount of iron will inactivate the bleach. Protect skin from liquid. Do not store **Oxygentle** at temperatures above 30°C (86°F).

Oxygentle is a Canadian Food Inspection Agency (CFIA) approved product for use in registered food processing plants.

DIRECTIONS

For the General Sanitizing of pre-cleaned hard surfaces:

Dilute 60 mL of **Oxygentle** in 3.78 L (2 oz per 1 US gal) of cold water with stirring. This dilution produces an 1100 ppm active hydrogen peroxide solution.

Optimal bleaching conditions for Laundry are:

pH (wash)	10.8 to 11.2
Time	10 to 12 minutes
Temperature	76 to 82°C (170 to 180°F)
Concentration	60 to 120 ml (2 - 4 oz) per 45 kg load

Please consult your Maxim representative for specific recommendations to meet your particular needs.
