

RESTORER

High Speed Restorer

DESCRIPTION

Restorer is formulated to enhance any of Maxim's floor finish products to their original gloss. It fills in the scratches and scuffs for a smoother shine while hydrating and lubricating the finish for superior burnishing.

Restorer is engineered with highly specialized ester-groups that actually repel heel marks. Rather than being drawn into the finish as in the case with most conventional products, **Restorer** keeps them just resting on the surface where they wipe right off with one of our electrolytic based cleaning products... this saves you time and money!

DIRECTIONS

Frequency:

Use **Restorer** once or twice a month for light to moderate traffic floors, weekly for moderate to heavy traffic surfaces, and once or twice weekly for very heavy traffic areas.

Preparation:

Dust mop entire floor surface. To remove embedded dirt, use *NeutraMax* with an auto scrubber. Refer to label for specific directions.

Dilution ratios:

Mop On: 1 part **Restorer** to 4 parts water.
Spray Buff: 1 part **Restorer** to 6 parts water.

Mop on or spray buff application:

Apply **Restorer** at the proper dilution with a clean mop. For best results, burnish immediately after drying with ultra high-speed equipment. For spray buff applications, mist floor lightly with proper dilution and buff immediately.

Contact your Maxim representative or distributor for burnishing pad recommendations.
