

Laundry Detergent

DESCRIPTION

Tornado laundry detergent is an economical product built for use in hot water. **Tornado** combines detergents and alkaline builders to provide a ready to use one-shot product.

SPECIAL INFORMATION

Tornado laundry detergent is a heavy duty detergent. Do not use on wool or fine fabrics. **Tornado** laundry detergent is not intended for hand washing.

DIRECTIONS

Before selecting the temperature of water for the machine, determine the type of fabric to be washed and select the correct temperature recommended by the fabric manufacturer. Some machines have the settings for different fabrics on the temperature dial (wool, nylon, cotton, synthetics). Use cool for darks and hot for whites.

Normal washing:

Use 75 grams (2.5 oz) **Tornado** detergent per regular laundry load. Less or more may be used, depending upon the soil condition of the wash load, the size of the machine and the amount and hardness of water in the machine.

Please consult your Maxim representative for specific feeding recommendations to meet your particular needs.
